

# Back on the farm

- water is expensive
- Crops not price supported
- ~~10~~ 10 times as much acre per foot

- When you see farmers talk ... plenty of water available by saying NO MORE COTTON in the valley & stop supporting the milk prices by not growing alfalfa anymore.

- the issue is ~~the~~ not water running white brushing your teeth.

- water table keeps dropping due to numerous wells in the county

- we use more water than is being replaced
