

Europe + Asia

- Unlike the US, they are doing full blown research on stem cells.
- A number of successes are being reported in human trials.

United States

- We are kept from resuming working on stem cell therapy for 5 years.
 - CIRM, ca. 90 / our progress / stem-cell-research
 - Now they realized there is money to be made in selling hope.
 - people are going to Mexico to get "cures" that don't really work. Faith healers convince people that they can cure them. People on others with "miracle drugs".
- Nature.com / news / row-over - controversial-stem-cell-procedures - flares-up-again.
