NOTES

Water

- Earth has a limited amount of water
- that amount does not change over time
- We've always had the same amount
- the water cycle - earth has its own purification system (picture is from USGS + Dept of Interior)
- Info comes from AG + Cal. Economy
- California is the agricultural engine of the United States
 - leads all states as top farm producer but California Ag is a small part of California's economy. Top 3 counties - Fresno, Tulare + Kings County.
- half of all fruits, nuts + veggies come from California
- California agriculture is huge!
- California is not classified as a "bread basket." It is not a top 5 producer of any grain product.
- California is the nation's largest dairy producer. (i.e. cheese, milk)
