Configuring the EHR

Component 11/Unit6
Health Summary and Clinical
Reminder Reports

Quality Reporting

- Improves quality of care, patient safety and efficiency.
- Highlights collection of quality data.
- Provides efficiency and consistency through structured routine reports.
- Provides flexibility through ad hoc reporting.

Health Summary Reports

- One time, ad hoc reports to answer non standard information needs.

- Customized reports as part of EHR's inventory of reports.

Clinical Reminders

- Uses the EHR system to identify Lab tests, procedures or other important activities that may be overlooked.
- Can be more effective and efficient than only using manual oversight.
