---

---

---

---

---

Slide 11

**Routers**

Moves packets from one network to another  
Uses IP addresses

Component 9/Unit 1.2      Health IT Workforce Curriculum  
Version 3.0/Spring 2011      11

---

---

---

---

---

---

---

---

Slide 12

**Routing Protocols**

- Two types:
  - Static routing
  - Dynamic routing
- Hop
  - Term used to describe the movement of data from one router to another
- Time to Live (TTL)

Component 9/Unit 1.2      Health IT Workforce Curriculum  
Version 3.0/Spring 2011      12

---

---

---

---

---

---

---

Slide 13

### Internet Control Message Protocol (ICMP)

- Used to send some messages back to sender in case of a delivery error
- Common messages
  - Unreachable destination or service
  - Time exceeded
  - Route redirection
  - Source quench
- Used with PING and TRACERT

---

---

---

---

---

---

---

---

---

---

Slide 14

### PING

```
C:\Users>ping 192.168.2.1

Pinging 192.168.2.1 with 32 bytes of data:
Reply from 192.168.2.1: bytes=32 time=5ms TTL=64
Reply from 192.168.2.1: bytes=32 time=3ms TTL=64
Reply from 192.168.2.1: bytes=32 time=3ms TTL=64
Reply from 192.168.2.1: bytes=32 time=3ms TTL=64

Ping statistics for 192.168.2.1:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
    Approximate round trip times in milli-seconds:
        Minimum = 3ms, Maximum = 5ms, Average = 3ms
```

---

---

---

---

---

---

Slide 19

**Media Access Control  
Continued**

- Contention-based
  - Also called non-deterministic
  - Devices can transmit at any time
  - Collisions can occur
- Examples
  - Ethernet
  - Wireless

Component 9/Unit 1.2 Health IT Workforce Curriculum Version 3.0/Spring 2015 19

---

---

---

---

---

---

---

---

Slide 20

**Ethernet**

- Uses CSMA/CD
  - Carrier Sense Multiple Access (CSMA)
    - "Listens" to media to see if there are any signals
    - If media is busy, it will wait and try again
    - If media isn't busy, the device will transmit its data
  - Collision Detection (CD)
    - If another device transmitted at the same time there would be a collision
    - Data from both devices are corrupt and will need to be resent

Component 9/Unit 1.2 Health IT Workforce Curriculum Version 3.0/Spring 2015 20

---

---

---

---

---

---

---

---

Slide 21

**Wireless**

- Uses CSMA/CA
  - Carrier Sense Multiple Access (CSMA)
    - "Listens" to media to see if there are any signals
    - If media is busy, it will wait and try again
  - Collision Avoidance (CA)
    - If the media is free the device will send out a signal letting other devices know that it is getting ready to use the media
    - The device then transmits data
- Used by 802.11 standards

Component 9/Unit 1.2 Health IT Workforce Curriculum Version 3.0/Spring 2015 21

---

---

---

---

---

---

---

---

Slide 22

**Other Data Link Protocols**

- Frame Relay
- Point-to-Point Protocol (PPP)
- Asynchronous Transfer Mode (ATM)
