Component 9 - Networking and Health Information Exchange

Unit 4-2 - Basic Health Data Standards

Unit 4-2 Objectives

• Understand the use, purpose and interrelation among sets of controlled vocabularies in use today.

• Identify the more common controlled vocabularies in use today: ICD, CPT, DRG, NDC, RxNorm, and LOINC.

International Classification of Disease

• ICD-9 – CM (Clinical Modification)
  – US is the only major country still using this controlled terminology; estimates to change range from $5 b to $15 b

• ICD-10 (ICD-10-CM and ICD-10-PCS)
  – Used by most of the world
  – US committed to change; target date 1 January 2013

• ICD-11
  – Dr. Chris Chute of Mayo Clinic is chief editor
  – Includes SNOMED, DRG
  – Target date for completion – 2015

• Sponsored by World Health Organization
Slide 4

Strict hierarchy

- Disease
  - Infectious Disease
    - Cholera
  - Lung Disease
    - Meningitis
    - Tuberculosis

Slide 5

Polyhierarchy

- Disease
  - Infectious Disease
    - Cholera
  - Lung Disease
    - Meningitis
    - Tuberculosis

Slide 6

ICD9-CM examples:
420 tuberculosis codes
(plus 69 hierarchical codes)

- 810: PRIMARY TB INFECTION*
- 810.0: PRIMARY TB COMPLEX*
- 810.00: PRIM TB COMPLEX - UNSPEC
- 810.01: PRIM TB COMPLEX - NO EXAM
- 810.02: PRIM TB COMPLEX - EXAM UNKN
- 810.03: PRIM TB COMPLEX - MICRO DX
- 810.04: PRIM TB COMPLEX - CULT DX
- 810.05: PRIM TB COMPLEX - HISTO DX
- 810.06: PRIM TB COMPLEX - OTHER TEST
- 810.1: PRIMARY TB PLEURISY*
- 810.8: PRIMARY PROGRESSIVE TB NEC*
- 810.9: PRIMARY TB INFECTION NOS*
- 010: PULMONARY TUBERCULOSIS*
- 010.0: PRIMARY TUBERCULOSIS - INFECTION
- 010.1: PRIMARY TUBERCULOSIS - PLEURISY
- 010.8: PRIMARY TUBERCULOSIS - NEC
- 010.9: PRIMARY TUBERCULOSIS - NOS
- 011: PULMONARY TUBERCULOSIS
- 012: OTHER RESPIRATORY TUBERCULOSIS
- 013: CNS TUBERCULOSIS
- 014: INTESTINAL TUBERCULOSIS
- 015: TB OF BONE AND JOINT
- 016: GONOCOCCAL TUBERCULOSIS
- 017: MILIARY TUBERCULOSIS
The Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)

- Created to standardize diagnoses in psychiatry or mental health disorders
- Includes diagnostic definitional criteria
- Published by American Psychiatric Association
- Not free for use

- Developed and owned by AMA
- Required for procedure reimbursement
- Required for physician visit reimbursement (E&M Coding)
- Licensing fee per application, per seat

CPT examples

76090: Unilateral mammography
76091: Bilateral mammography
76092: Screening mammography, bilateral (two view film study of each breast)
76096: Mammographic guidance for needle placement, breast (e.g., for wire localization or for injection), each lesion, radiological supervision and interpretation
76645: Ultrasound, breast(s) (unilateral or bilateral), B-scan and/or real time with image documentation
Slide 10

**Diagnosis Related Groups (DRG)**

- Diagnoses, procedures, age, complications and other factors expected to have similar hospital resource use
- CMS codes for prospective payment

---

Slide 11

**DRG examples: pneumonia**

- 75 Respiratory disease with major chest operating room procedure, no major complication or comorbidity
- 76 Respiratory disease with major chest operating room procedure, minor complication or comorbidity
- 77 Respiratory disease with other respiratory system procedure, no complication or comorbidity
- 79 Respiratory infection with minor complication, age greater than 17
- 80 Respiratory infection with no minor complication, age greater than 17
- 89 Simple Pneumonia with minor complication, age greater than 17
- 90 Simple Pneumonia with no minor complication, age greater than 17
- 475 Respiratory disease with ventilator support

---

Slide 12

**National Drug Codes (NDC)**

- US Food and Drug Administration
- Identifiers for labeled, regulated products
- Labelers get 4- or 5-digit code
- Product code set by labeler: 3 or 4 digits
- Package code set by labeler: 2 digits
Slide 13

**RxNorm**

- Food and Drug Administration
- Veterans Health Administration
- National Library of Medicine
- Drug knowledge base vendors

---

Slide 14

**RxNorm**

- C0350474: Diazepam 5 MG Oral Capsule [Valium]
- Synonym: Valium 5 MG Oral Capsule
- C0697435: Diazepam 5 MG Oral Capsule [Solis]
- C0991533: Oral Capsule
- C0699187: Valium
- C0992254: Diazepam 5 MG
- C0976327: Diazepam 5 MG Oral Capsule
- C1256450: Valium Oral Capsule
- C1249939: Diazepam Oral Capsule

---
Structured Product Labeling

- Defines the content of human prescription drug labeling in XML format
- Displayed in web browser using SPL style sheet
- Contains labeling plus machine readable information
- It is an HL7 standard and has been submitted to ISO

The DailyMed

- Derived from Structured Product Labeling
- Medication information in computer readable form
- Easily imported into information system
- Comprehensive
- Includes all marketed products
- Reliable
- Information directly from labeling
- Up-to-date
- New information or changes added daily
- Free

Logical Observation Identifiers Names and Codes (LOINC®)

- Laboratory portion
  - Standard test names and codes
  - Includes chemistry, hematology, serology, microbiology (including parasitology and virology), toxicology
  - Drugs and cell counts for blood smear and cerebrospinal fluids
  - Antibiotic susceptibilities
- Clinical portion
  - Vital signs, hemodynamics, intake/output, ECG, obstetric ultrasound, cardi echo, urologic imaging, pulmonary ventilator management, survey instruments, other
Slide 19

**LOINC code**
- Codes are unique and have no meaning
- Format is nnnnn-n where the last n is a mod 10 check digit
- Typical code: 4764-5
- Each LOINC record corresponds to a single test or panel
- Includes long names, short names and synonyms

---

Slide 20

**Definition Axes**
- Component name (analytic)
- Property measured
- Timing
- Type of sample
- Type of scale
- Method (where relevant)

is used to separate axes

---

Slide 21

**Examples**
- SODIUM:SCNC:PT:SER/PLAS:QN
- SODIUM:SRAT:24H:UR:QN
- GLUCOSE:3H POST 100 G GLUCOSE PO:SCNC:PT:SER/PLAS:QN
LOINC today

- The current version of LOINC is v2.3.2 and was released in June 2010. The database contains 58,967 terms. It is free and may be downloaded from www.loinc.org

- Mapping Assistant (RELMA) available for free

RELMA

The Regenstrief Institute provides a Windows-based mapping utility called the Regenstrief LOINC Mapping Assistant (RELMA) to facilitate searches through the LOINC database and to assist efforts to map local codes to LOINC codes. Like the LOINC database, this program is also available for free use.

Example of LOINC’s Use in Data Exchange

- HL7 Message:
  OBX|...|Observation|...|Result|...

- Observation = Code^Name^Coding System
- Logical Objects, Identifiers, Names and Codes
- Self-defining names for lab tests
In this section, you have learned some of the more common controlled vocabularies. In many cases, a particular terminology is used for a specific purpose. In most cases, the doctor enters a textual term and a coder does the actual coding. You will be exposed to many of these vocabulary sets.
